

# King County Flood Control District Advisory Committee Meeting

## Overview of the District

Michelle Clark, Executive Director

June 16, 2022

# Purpose of King County Flood Control District

- The District was created in 2007 to create a dedicated and sustainable funding source to repair and maintain over 500 flood risk reduction facilities (existing levees and revetments).
- The District's 6-yr CIP primarily dedicated to addressing reducing the impacts of riverine flooding .
- Grant funds are intended to address other non-riverine flooding issues including stormwater flooding, coastal erosion, and habitat restoration.

# Integrated Floodplain Management

The District is committed to the principles of Integrated Floodplain Management through the implementation of multi-benefit capital projects. (FCD20-07 Multi-Benefit Motion)

- The District will prioritize the design and implementation of multi-benefit floodplain management projects that reduce flood risks, ensure public safety, and restore river ecosystems in an equitable and just manner while advancing inter-related interests of the community including, where applicable:

# Multi-Benefits

- Equity and Social Justice
- Environmental Justice
- Habitat protection and salmon recovery
- Resilient communities and ecosystems
- Productive and viable agriculture
- Sustainable development
- Jobs and sustainable livelihoods
- Open Space conservation
- Sustainable and clean water
- Recreation and other opportunities to connect people with nature

# Planning and Implementation

The District carries out its mission through the implementation of its 6-yr CIP through:

- **Foundational studies for capital projects**
  - Channel Migration
  - Level of Service
  - Capital Investment Strategies
- **Capital Projects**
  - Repair and maintenance of existing facilities
  - “Rebuild” existing structures
  - Acquisitions of repetitive loss properties in repetitive loss areas
